PATRONS OF "FRIENDS' ALMANAC."

Arrived in our journey through time to another mile marked 1855, I feel a glow of affection to the patrons of "Friends' Almanac," and am glad of giving expression to my feelings towards you. I find, as we are journeying onward, little hints and auxiliaries that have been useful to some of our most aged travellers have been derived from an Almanac, formerly published by Benjamin Franklin, called "Poor Richard's." Much of the economy of the present day has been inculcated from that work, and it is frequently quoted with assurance from the moralist and the naturalist.

—The aim and design of "Friends' Almanac" (including every thing in intention, that is sound and correct, in the moral and physical world,) is higher; we aspire to a destiny more exalted, more perfect in character, and, in fact, than is to be found in mutability. How, then, shall we attain it? How can we make progress onward towards such a state? The answer is plain and clear to all the votaries of truth. It seems to me we shall all admit freely, that all will be accomplished when we faithfully adhere to the example of Christ, the Son of God, viz.: "To this end was I born, and for this cause came I into the world, that I should bear witness unto the truth. Every one that is of the truth heareth my voice."—John xviii. 37. Oh! let this testimony sink deep into our hearts. Let every one who reads these lines consider him or herself bound to "walk by the same rule, and to mind the same thing." We live, and move, and have our being, for this great purpose; our happiness in time and in eternity depends upon it. Oh! let a reverence for truth be deeply impressed and faithfully inculcated in the minds of children; and let me conclude with the exhortation of the wise man of old, "Whatsoever thy hand findeth to do, do it with thy might, (and though that might, like Gideon's, may seem to be small, it will always prove sufficient) for there is no work, nor device, nor knowledge, nor wisdom, in thee, whither thou goest."—Ecclesiastes ix. 10.

And ever, with affection and esteem, I remain your assured

JOSEPH FOULKE.

NOTES TO THE READER.

I. The Astronomical calculations in this work, are made to true clock time, the same as in the United States' Almanac, the North American Almanac, and other standard works. The effects of Refraction, according to the latest improved Tables of Bessel, and the Equation of Time, have both been applied to the times of the Sun's rising and setting : so that the Sun, the Almanac, and a good Clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, setting, or southing of the Sun, Moon, or Stars,—but more accurately by the Sun, (or the Southing of the Sun, or a fixed Star) any where on or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star may be carried several days forward by subtracting, or backward by adding 4 minutes per day.

IV. The common day of 24 hours, begins at midnight, and morning (marked morn.) continues from midnight till noon; and afternoon (marked aft.) continues from noon till midnight; this should be remembered carefully when looking for the times of the rising, setting or southing of the Moon or Stars soon after midnight.

V. Under Moon's Phases, First Quarter on the 23d of 2d month, and Last Quarter on the 1st of 11th month, each marked morn. at Cincinnati; will occur respectively in the aft. at the times stated under the headings, New York, Philadelphia and Baltimore.

ECLIPSES.

In the year 1855 there will be two Eclipses of the Sun and two of the Moon.

I. The Moon will be totally Eclipsed on the evening of the 1st of Fifth month, and the morning of the Second. Visible as follows :

	N. Y.		Phil.		Balt.		Cin.	
	H.	M.	H.	M.	H.	M.	H.	M.
Beginning,	9	18	9	13	9	7	8	36

Middle,	11	9	11	4	10	58	10	27
End of total darkness,	11	57	11	52	11	46	11	15
End,	1	0	0	55	0	49	0	18

P. M. on the 1st.
A. M. on the 21.

Digits eclipsed $18\frac{1}{2}$ on the southern limb. Begins 123° from vertex to the right. Ends 75° to the left.

II. The Sun will be partially Eclipsed on the 15th of Fifth month, at 9 o'clock, P. M., consequently invisible to us. Visible in northern parts of Russia and Siberia.

III. A total Eclipse of the Moon will occur on the morning of the 25th of Tenth Month. Visible as follows :

	N. Y.		Phil.		Balt.		Cin.	
	H.	M.	H.	M.	H.	M.	H.	M.
Beginning,	0	48	0	43	0	37	0	6
Beg. of total darkness,	1	49	1	44	1	38	1	7
Middle,	2	33	2	28	2	22	1	51
End of total darkness,	3	17	3	12	3	6	2	35
End,	4	19	4	14	4	8	3	37

A. M. on the 25th.

Digits eclipsed $17\frac{1}{2}$ on the Northern limb. Begins 52° from vertex to the right. Ends 104° to the left.

IV. There will be a partial Eclipse of the Sun on the 9th of Eleventh month, the middle occurring at 2h. 16m., P. M. invisible. This eclipse will be visible in Australia and over a large portion of the South Pacific Ocean.

The following maxims were taken promiscuously from a little work entitled, "The Economy of Human Life," first published in 1750. The author, Robert Dodsley, was born of parents in humble circumstances. In early life he was employed as a footman; but his natural talents, and great perseverance, soon recommended him to the favor of many eminent personages; among whom were Pope, Chesterfield and Johnson. Under their patronage he published several works of considerable merit, which were favorably received by the public. "The Economy of Human Life," particularly had a great degree of celebrity. It was admired, for the genuine sense of goodness and virtue inculcated by its maxims, as well as for its clear, succinct, and lofty style.

The thoughtless man bridleth not his tongue; he speaketh at random, and is entangled in the foolishness of his own words.

As a plain garment best adorneth a beautiful woman, so a decent behaviour is the greatest ornament of wisdom.

GWYNEDD BOARDING SCHOOL

FOR YOUNG MEN AND BOYS.

Situate 18½ miles from Philadelphia, on the turnpike leading thence to Bethlehem.

The course of instruction will embrace the usual branches of a liberal English education, viz.: Orthography, Reading, Writing, Grammar, Rhetoric, Composition, Arithmetic, Algebra, Geometry, Mensuration, Surveying, Astronomy, History, Geography, Natural Philosophy, Chemistry, and Physiology. Also, elementary instruction in Latin.

A good assortment of apparatus has been obtained for the purpose of illustrating the subjects connected with Natural Philosophy, Chemistry, Astronomy and Solid Geometry.

Printed reports of the progress in study, conduct, &c., of the pupils, will be forwarded to their parents or guardians monthly.

The location is healthful, pleasant and easy of access; stages which pass the Institution, leave the White Swan Hotel, Race street above Third, every morning at 4 o'clock.

The school year will be divided into two sessions of twenty weeks each; the summer session commencing the third Second-day in the Fifth month, and the winter session on the second Second-day in the Eleventh month.

The terms for Boarding, Washing, Tuition, &c., are \$60 for the summer session; \$70 for the winter session, one half payable in advance, and no extra charges. Reading-books, pens,

ink and pencils furnished gratuitously. All other books and stationery at the usual prices. It is expected that each pupil will bring his own towels and wash basin, and have each article of clothing conspicuously marked.

All communications should be addressed to the Principal.
